

# LIFE / DEATH / LIFE

*She is the Goddess of Nature's Cycles. She knows that death feeds life,  
that all food is a willing death giving life to all that needs nourishment.*

*She gives herself back to Nature as food for the others to come  
and is sheltered by the antlers of Nature while she rests.*

*Her glowing bones are the indestructible life force,  
quietly waiting to be reborn*

*into the Maiden Goddess who waits below her.*

*And so it goes around and around,*

*Life, then Death, then Life.*
